

## European Molecular Biology Laboratory (EMBL) Australia

EMBL Australia undertakes activities that support Australia's Associate Membership of EMBL, a hub and spoke network of Molecular Biology facilities around Europe.

### Key facts

- States: VIC, ACT, QLD, SA, NSW, WA
- Lead institute: Monash University
- Project status: In progress
- Australian Government contribution:
  - \$3.35 million from the National Collaborative Research Infrastructure Strategy program to support Australia's Associate Membership of EMBL
  - \$8.0 million under the Super Science Initiative to 2012-13 to set up the partner laboratory network, the bioinformatics resource, PhD student programs and access for Australian researchers to EMBL infrastructure
- Funding partners include the host institutions and CSIRO.

### Project deliverables

Funding under the National Collaborative Research Infrastructure Strategy (NCRIS) has enabled Australia to become the first Associate Member of EMBL.

Additional funding from the Super Science Initiative has allowed the commencement of an EMBL Australia Partner Laboratory Network, the development of a bioinformatics resource facility, the development of PhD student programs and access for Australian researchers to EMBL's infrastructure in Europe.

### Participating organisations

- Monash University (lead agency)
- The University of Melbourne
- The University of Sydney
- The University of Queensland
- The University of New South Wales
- The University of Western Australia
- The Australian National University
- The University of Adelaide
- CSIRO
- South Australian Health and Medical Research Institute (SAHMRI)
