

List of Registered Child Care software

The software listed on this page has been developed by software producers who have provided a declaration to The Department of Education and Training that the software has been tested against test scenarios provided by Education, and have undertaken to abide by the *CCMS IT Security Principles For Software Developers*.

Education is satisfied with the results against the test scenarios, however, Education has not done any independent testing and listing on this page does not constitute an endorsement of the product by Education.

Education does not accept any liability for these products; any adverse effect the use of these products may have on your existing IT environment; or any outcome arising as a result of using these products including failure by you to comply with your legislative obligations. You must satisfy yourself that the particular product is suitable for your service and existing IT environment. You should evaluate alternatives and properly evaluate and test any product chosen to ensure that it works as expected and without side effects for your systems before proceeding to implement it.

You should seek independent advice if you believe that a statement made by a software producer is false and/or misleading.

If you wish to purchase software listed on this page you should do so on the basis of independent consideration and/or advice.

New Child Care Subsidy System

A new Child Care Subsidy System (CCSS) will be introduced from 2 July 2018 to support the New Child Care package.

To interface with the new system, software providers, including existing ones, will need to register their software. Consultations are underway to assist software providers prepare for the new system. The list of registered child care software has been updated to indicate software products that intend

to transition to the new system. Further updates will occur as software products are tested and become registered.

In the lead up to 2 July 2018, Child Care Providers are encouraged to talk to their software provider about their plans to transition to the CCSS.
